

CSE344 SOFTWARE ENGINEERING TERM PROJECT PROPOSAL

TEAM MEMBERS:

Tayfun Yurdaer, 150115067

Hakan Yalçın, 150114021

Erkan Güngör, 150113066

Project Name: Inventory Management Android App

Description:

Purpose of this project is to make a software application that is usable in real world. The project will be used to manage the inventory system of the user. User will be able to record all details about the product. Users will register an inventory group. They will be able to see every product details that is recorded and the log files showing the transactions on the system. This app will help to manage users inventory records easier and make communication with coworkers easier.
